Project settings

You have a project using BigQuery and want to list all the jobs in that project. To set a project as a default, what should you do?

Selecione uma alternativa

- A** Use "bq config set project" to set the default project.
- B** Use "bq generate config-url" to generate a URL to the Google Cloud Platform Console to set the default project.
- C** Use "gcloud config set project" to set the default project.
